SITUATION

Current Situation:	The acreage increased due to an increase in fire activity late yesterday afternoon. Overnight, fire crews continued their work to establish and reinforce containment lines. The fire area is seeing poor humidity recoveries at night allowing the fire to remain very active throughout this time. The fire is burning in drought stricken chaparral and in an area of severe tree mortality. Damage assessment crews are on scene to evaluate and inspect the area. Power lines supplying power to Yosemite National Park continue to be threatened.
